

**Jayesh A. Punater**  
President & CEO

Jayesh Punater is the founder and visionary behind Gravitass Technology. He was the first in the marketplace to focus on high quality service combined with a "holistic" view of technology providing small and mid-sized financial services firms a completely outsourced option for their IT operations. Jayesh focuses on Gravitass' growth strategy and manages overall operations with the management team. Prior to founding Gravitass, Jayesh held management positions in various technology consulting and manufacturing companies, including Manager of the Financial Services Vertical for New York based system integrator DNA, and Manager of Technical Support for high-end workstations manufacturer 68000 Inc. Jayesh has a B.S. in Electrical Engineering from Arizona State University and has extensive executive training in marketing, finance, and management. He has also taught a course on entrepreneurship at Fordham University.
